MINNESOTA LINGO

A condition where both the tissue and skin freeze, Frostbite can occur quickly, and risk increases as the air temperature falls below 0oF. When the wind chill falls to -15oF it can affect exposed skin in under 15 minutes. Frostbite is a main reason Minnesotan skin may not experience fresh air for most of the year, so it's no wonder there is no sales tax on the basic necessity of clothing, which is needed to cover the entire body.
